**GLBB Japan announces a small factor pluggable (SFP) device
[GS3-SFP] to connect serial console**

GLBB Japan K.K (known as GLBB; Headquarter: Okinawa, Chatan; Branch: Tokyo Minato ku; CEO: Craig Watson), a company that provide internet services to various domestic and international companies has announced a type of SFP device [GS3-SFP] that can use SFP/SFP+ ports to connect serial console.

1. An overview of [GS3-SFP], an SFP device for serial console connection

The SFP device to connect serial console [GS3-SFP], can be inserted into an SFP port of any switch or router, regardless of brand and maker to connect and provide access to network equipment serial console.

2. Features of [GS3-SFP], an SFP device for serial console connection

- [GS3-SFP] supports encrypted SSH that allows secure connections throughout the network
- Each [GS3-SFP] device has an IP address and embed TCP/IP protocol stack
- GS3-SFP includes console functions and can be used as a stand-alone device
- As [GS3-SFP] is compliant with any SFP port of any brand or maker, it can be installed in already available equipment, to effectively use of existing environment without additional rack space.
- [GS3-SFP] senses the serial console and can detect and display power on/off status of connected device
